Management Report

Management presents their report, together with the unaudited condensed interim financial statements, of Jervois Mining USA Limited (the "Company") for the three and six months ended 30 June 2022 (the "period").

1. Director

The sole Director of the Company during the whole of the financial period and up to the date of this report was:

Name	Role
Bryce Crocker	Chief Executive Officer

2. Principal activity

The principal activity of the Company during the period was mine construction.

3. Principal address

1309 S Challis St, Salmon, Idaho, 83467-5453, United States of America ("United States")

4. Dividends paid or recommended

There were no dividends paid, recommended, or declared during the period.

5. Significant changes in the state of affairs

There were no significant changes in the state of affairs of the Company.

6. Review of operations

The net loss after tax of the Company for the three-month period ended 30 June 2022 was US\$3.1 million (three-month period ended 30 June 2021: net loss after tax of US\$0.4 million). The net loss after tax of the Company for the six-month period ended 30 June 2022 was US\$4.2 million (six-month period ended 30 June 2021: net loss after tax of US\$0.6 million).

During the period, operations have focussed on the ongoing development of the Idaho Cobalt Operations ("ICO") cobalt-coppergold mine located outside the town of Salmon, Idaho, United States. ICO is a key asset in delivering Jervois Global Limited's ("Jervois", the ultimate parent of the Company) strategy to become a leading independent cobalt and nickel company providing metals and minerals for the world's energy transition through a Western supply chain. ICO will be the United States' only primary domestic mine supply of cobalt, a critical mineral used in applications across industry, defence, energy, and electric vehicles.

In June 2022, Jervois announced it expected to commence commissioning the plant at ICO in September 2022, with first ore through the mill in October 2022 and sustainable, full-rate ore processing forecast by February 2023.

With detailed engineering, procurement, and commitments all more than 90% complete, Jervois revised the final forecast capital expenditure to bring ICO into production to US\$107.5 million (from US\$99.1 million), an increase of ~7.5%. Project construction experienced cost pressures due to the significant United States inflationary environment, compounded in recent months due to contractor shortages and poor weather conditions across May and June 2022. Weather-related delays have affected site installation for the accommodation camp, which is now expected to be operable in late August/early September 2022.

In February 2022, the Company announced it had completed the first of two US\$50 million drawdowns of its US\$100 million bond offering proceeds from the escrow account, as contemplated by the terms of the bonds. Subsequent to the period end, in July 2022, the Company completed the second US\$50.0 million drawdown of its US\$100 million bond offering proceeds from the escrow account upon satisfaction of the pre-disbursement conditions precedent.

JERVOIS MINING USA LIMITED Management Report

ICO construction and mine development progress

As of June 2022, mine development continued at ~27 feet per day. Planned increases to underground working faces, improved water management and road conditions, as well as additional personnel and greater utilisation of existing and future mining equipment on site are expected to continue to improve mine development productivity. The Company and its mining contractor, Small Mine Development, remain confident in the revised mining production targets that underpin the capital cost update.

The SAG mill, ball mill and crusher are each in place, and work continues with facilities construction and equipment placement.

An official opening ceremony is scheduled at site for 7 October 2022, with expected participation of United States political leadership and Australian government delegates.

As of 30 June 2022, Jervois had spent US\$66.9 million of the total capital expenditure budget. Capital expenditure in Q2 2022 was US\$25.9 million.

Drilling at ICO

The previously announced initial US\$1.2 million infill programme commenced in Q1 2022 and is set to be complete in August 2022. Infill drilling rates over 200 feet per day are being achieved as part of a 19,000 feet underground campaign to decrease hole space aiming to enhance ore body knowledge and de-risk early mining.

In June 2022, Jervois approved an additional US\$3.6 million for drilling to complete additional infill and first expansion drilling from both surface and underground platforms to further define and expand its RAM deposit within ICO. This will take total planned drilling footage in 2022 to 46,000 feet.

Both drilling campaigns will improve ICO's resource model and will be used to develop a production block model for both short-and medium-term mining operations and will target expansion down dip of the currently defined and known deposit. The RAM deposit remains open at depth and along strike, and the Company has confidence that there exists a strong potential of both resource and reserve expansion. Consistent with this expectation, planning is underway in relation to the Company's neighbouring Sunshine deposit and historical mineral resource, with preparations for a 2023 summer drill programme well underway. The historical Sunshine cobalt resource is located a short traverse to the ICO mill and concentrator currently under construction.

Principal risk factors affecting the Company include:

- Weather, which is a key risk regarding potential delays, albeit reducing in spring.
- Inflationary pressures in the United States in relation to labour and materials.
- Supply chain disruptions and costs.
- Construction contractor staffing.

For additional risks affecting the Company, reference is made to the audited financial statements for the year ended 31 December 2021, which can be found on Jervois' website.

7. Director's declaration

In the opinion of the Director of the Company, the financial statements that are set out pages 5 to 9 below give a true and fair view of the Company's financial position as at 30 June 2022 and of its performance for the financial period ended on that date.

JERVOIS MINING USA LIMITED Condensed Statement of Financial Position As at 30 June 2022 (Unaudited)

	30 June 2022 US\$'000	31 December 2021 US\$'000

Notes to the Condensed Interim Financial Statements For the three and six months ended 30 June 2022 (Unaudited)

1. Corporate information and basis of preparation

These unaudited condensed interim financial statements cover Jervois Mining USA Limited (the "Company") at the end of, or during, the three and six months ended 30 June 2022 (the "period"). The financial statements are presented in United States dollars, which is Company's functional and presentation currency.

These unaudited condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards and interpretations adopted by the International Accounting Standards Board. These unaudited condensed interim financial statements have been prepared for information purposes only and may not be indicative of the financial performance of the Company. These unaudited condensed interim financial statements have been rounded to the nearest thousands.

2. Principal activity

The principal activity of the Company during the period was mine construction.
